# Ceiling LED Pendant

START FROM HERE

• Make sure **POWER** is **COMPLETELY OFF** at the fuse box
• Have your fixture installed by a qualified licensed electrician
• Prepare everything in a clear area
• Wear gloves at all time during this installation
• Read instructions carefully before you start assembly
• Keep this installation sheet for future reference

Technical Support: 1-855-855-8926

Please Note:
• All Kuzco LED fixtures come with pre-wired LED module(s).
• Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
• For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

1. Remove the fixture from its original packaging and remove the fixture mounting plate **(1c)** from within the hardware package. Attach the fixture mounting plate **(1c)** to the electrical junction box **(1a)** on the ceiling using the two screws **(1e)** provided in the hardware package.

2. Attach the fixture to the mounting plate, which is attached to the electrical junction box on the ceiling. First attach all wiring **(1b)** with the provided marrets (white to white "N", black to black "L", ground to ground "G"). Push the screws **(1d)** through the holes in the back of the canopy so they are poking through the canopy **(2a)**. Once this is complete you can screw on the decorative nuts **(2b)** until the canopy **(2a)** is secured to the ceiling.

3. Select the desired length you wish the pendant to hang. To shorten or lengthen the fixture push up on the canopy nipples **(2c)** and push/pull the cable, release to secure**.**

4. Take note, the top pipe **(3b)** travels through the casing **(3c)**. With the LED **(3d)** exposed, thread the pendant glass **(3e)** to the LED **(3d)**. Gently guide the LED stem **(3b)** up into the casing **(3c)** and thread the small pipe **(3a)** turning clockwise. **(see illustration 1)**

5. You have now completed the installation of your fixture, please enjoy.
