IC Lights T2, Black - Specification Sheet by Michael Anastassiades

Mounting	Table Top
Lamp (Bulb) Description	1 x 150W T-10 Medium Frosted Halogen (Included)
Environment	Indoor - Dry Location
Finish	Black
Technical and Product Description	IC Lights T by renowned designer Michael Anastassiades consists of a thin steel base that twists and bends at an angle. From there, a blown-glass opaline orb delicately balances. The table lamp, which casts diffused light, can be adjusted by a dimmer on the power chord. IC Lights T is now available in a brand-new black finish that adds dimension to the stunning collection of deceptively simple designs.

IC Lights T comes in three models in either a brass, chrome, or black finish:

- IC Lights T1 High: height 20.8"; base width 12.6"
- IC Lights T1 Low: height 15"; base width 6.9"
- IC Lights T2: height 13.7"; base width 11"

Explore the entire IC Lights family here.

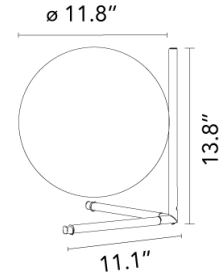

Inspiration behind the design:

Designer Michael Anastassiades takes cues from the act of a contact juggler, who skillfully spins objects. Similarly, the IC Lights feature a beautiful spherical diffuser that appears to balance on an angled base. Meanwhile, the name "IC" refers to the identity designations that immigrants are assigned when they enter the United Kingdom, in a nod to the balancing act that these communities perform while adjusting to a new society.
