Fig.1

PREPARATION

1. Shut off the power at the circuit breaker and remove existing fixture, including the mounting hardware.
2. Carefully unpack your new fixture and lay out all the parts on a clear area. Be careful not to lose any small parts necessary for installation.

MOUNTING THE FIXTURE (FIG. 1)

3. Remove the mounting screw (C1) and rubber gasket (D1) from the fixture.
4. Secure the mounting plate to the junction box using the junction box screw (B1). The side of the mounting plate marked "GND" must face out.

CONNECTING THE WIRE (FIG. 2)

5. Connect the driver input wires to junction box wires as shown in **Fig. 2**, making sure that all wire connectors (A1) are secured. If your outlet box has a green or bare copper ground wire, connect the fixture's ground wire to it. Otherwise, connect the fixture's ground wire directly to the back plate using the green screw provided. After wires are connected, tuck them carefully inside the junction box.

MOUNTING THE FIXTURE (FIG. 1)

6. Place the fixture over the mounting plate, secure it with the mounting screw (C1) and rubber gasket (D1).
7. To prevent moisture from entering the outlet box and causing a short, use clear caulking (i.e. indoor/outdoor silicone sealant) to outline the outside of fixture back plate where it meets the wall. Leave a space at the bottom to allow moisture to escape Fig.3.
